Business Information

THESE PRICES are in effect for Fall 1947—Spring 1948 season.

PRICES named in this Trade List apply only to orders placed by nurserymen, florists and dealers.

PACKING. All goods are packed in boxes and bales for which we charge sufficient to cover cost of material used. We will add this cost to your invoice. **This cost applies whether you remit with order or buy on time terms.**

CLAIMS, if any must be made immediately upon receipt of goods, and if just made satisfactory, but in no case are we responsible for more than the purchase price of the stock in question. **We will not be responsible for failure to fill orders in full or for any damage or delay to stock after delivery to the transportation company.**

TERMS. We offer the usual terms; net 30 days from date of shipment to those of known responsibility **but must have satisfactory business references from others or remittance must accompany oder.** Those desiring stock shipped COD will please remit **one-fourth** the amount of their purchase when ordering. Other terms by special arrangement.

NON-WARRANTY. We give no warranty expressed or implied, the purchaser assuming all risk and responsibility of transportation, growth, planting, life of stock or any other matter on any stock we sell. We send out good stock, carefully grown and packed but cannot control conditions after it leaves our care. We exercise the greatest care to keep our stock true to name and are willing to replace, on proper proof any stock that may prove otherwise, or refund the amount paid us for such stock, but it is mutually agreed that we shall not at any time be liable for any greater amount.

TELL US HOW TO SHIP. Whether by express, motor truck or railroad freight. If by motor truck or railroad freight, tell us the route over which line you want delivery made. If you do not give this information we will use our own judgement as to route and method to use. **It is mutually agreed that whether you name the route or you leave it to our own selection that we will not in any way be responsible for time or condition of delivery and that our responsibility ceases upon our delivery to the transportation company.**

HARDINESS OF PLANTS. When hardiness of plants is mentioned herein it applies only to this section.

TIME OF SHIPMENT. We ship most every week in the year with the possible exception of during the winter when bad weather makes it impossible, although this is very seldom. Of course, there is a regular season for shipping the different plants but if you want them out of season and are willing to take the risk of good delivery we will pack with the utmost care and get them off to you at most any time you want them.

PLAN TO VISIT OUR NURSERY

We will certainly be glad to have you come see our stock for yourself. We believe you will find it compares favorably with that grown by other nurseries. Some of our customers have told us it is better than is furnished by some others. We are on the Eastern Shore of Maryland, 100 miles south of Wilmington, Del., 100 miles from Cape Charles, Va., 90 miles from Annapolis, Md., via Matapeake ferry, 150 miles from Baltimore, Md., via Elkton, Md., 225 miles from New York, N. Y. We hope you can come see our stock, maybe not so much to see now, but it is good driving on the famous Eastern Shore.

Blueberries

There has developed an enormous demand for these plants, especially for fruit. If you have not been getting some of this trade you are missing some good profits. They are easy to grow and handle. Put in a small stock and let us supply you; we will send to you or direct to your customers under your tags. We suggest ordering early as we have not been near able to supply the demand for these plants the past two seasons.

Prices of Blueberry Plants	Each	10	100
3 to 6 in., 1 yr	$0.40	$3.00	$20.00
6 to 12 in., 2 yr.	.55	4.50	35.00
12 to 18 in., 3 yr.	.75	6.50	50.00
18 to 24 in., 3 yr.	.90	7.50	65.00
2 to 3 ft., 4 yr.	1.10	10.00	85.00

If larger plants are wanted send inquiry for prices. The 3 to 6 in. size we are offering are a nice size to plant to grow on to a larger size for resale purposes. If you are interested in this size let us know and we may be able to quote attractive prices in large quantities. We can also furnish a lighter grade 6 to 12 in. than above at $27.50 per 100. If you want this lighter grade be sure and specify it when ordering otherwise the regular grade will be sent.

Description of Varieties

BURLINGTON. This is one of the newer varieties. Berries are excellent flavor, very large size and quite uniform. An unusually good keeper. Bush is medium high and crops heavily, and later in the season than other late varieties.

CONCORD. The bush is of upright habit and at maturity exceeds six feet in height. The young growth is bright red in winter. The berries are large, frequently reaching three-quarters of an inch in diameter. They usually ripen a few days earlier than Rubel and are very fine in flavor.

JERSEY. The bush is of vigorous habit and grows very large. The winter color of the young growth is a light red over golden-brown. The berries are among the very largest, light blue and ripen about the same time as Rubel.

JUNE. A little earlier than Cabot. Berry is large, of medium blue color, sweet and delicious when fully ripe, with a slight sub-acidity. Newer and probably better than Cabot.

RANCOCAS. The bush of slender, vigorous, upright habit rarely surpasses five feet in height. The winter twigs are dark red. The berries are somewhat larger than those of Rubel and begin to ripen several days earlier.

RUBEL. A vigorous, productive variety. Well developed bushes stand six feet high and the winter color of the young wood is a rich red. The large berries of fine color are usually ready to pick the first week in July.

Cuprinol Stops and Prevents Rust

Wood, fabric and rope don't just rot. They're eaten up by living fungi, termites and borers. Cuprinol puts a stop to it—by an unusual principle of wood and fabric preservation. Originated abroad, cuprinol has long been used by leading florists and nurserymen of Denmark, England and other European countries. Cuprinol is surface applied—by paint brush, dipping, spray gun or swab. Cuprinol treated material is non-poisonous to higher forms of animal and plant life. Exhaustive tests have proved that Cuprinol treated wood and fabric is non toxic to seedlings and plants in any stage of growth.

The manufacturers of Cuprinol say the wood will last three times as long as when untreated. Get a supply and see just what it will do. **"When Cuprinol goes in rot stays out."**

1 gal cans at $2.90 per gallon; 5 gal. pail at $2.80 per gal.; 50 gal. drums at $2.70 per gallon.

Lovett — Pink Pearl — Salmon Beauty — Snow — Sweet Brier — and others.

KURUME AZALEAS

The Kurume Azaleas are one of the most showy of all flowers for the garden. They are also well adapted to forcing —thousands of them being sold for Easter, Mother's Day and Decoration Day. They are comparatively easy to grow and they make such a wonderful display that the demand is constantly increasing. Many of the varieties are hardy out of doors as far north as Long Island. They are extremely floriferous, and in season the blossoms completely cover the plants. The colors are almost every hue and shade except yellow, as you will find below.

ALUMINUM SULPHATE

Azaleas, Rhododendrons, Blueberries, Cornus Florida, Heather, Kalmia and many other plants require an acid soil. Acid-forming organic matter, such as well rotted oak leaves helps to increase acidity. Aluminum Sulfate is a good chemical for increasing soil acidity by using ¼ to ½ pound per square yard. Also used for turning hydrangeas blue.

10 lbs., $1.25; 50 lbs., $4.00; 100 lbs., $6.00.

Gable's Hardier Azaleas

As many of you know, we have been growing and recommending these Gable Hardier Azaleas for several years, and the more they are known the bigger the demand for them.

Mr. Gable has constantly had in mind a hardier type of Azalea with a much wider color range than has heretofore been possible to secure. He has had wonderful success in his efforts. We have been keeping in touch and working closely with Mr. Gable and are much pleased that we can offer the following varieties. Mr. Gable is still working for even better ones and we will offer stock of them just as soon as we have enough to warrant us in doing so.

Prices of Gable Azaleas:	**10**	**100**
* 2 in. pot plants	$2.50	$20.00
* 2 yr. field beds XX trans.	4.50	40.00

KAEMPFERI HYBRID AZALEAS

In these new Kaempferi Hybrids—the result of crossing Kaempferi and Malvatica—there has been obtained the hardiest type of evergreen Azalea, with a good range of form and color in the flowers so far achieved. Several years' tests have demonstrated that these new Hybrids are just as hardy as Kaempferi, until now the hardiest of the evergreen sorts. In connection with these Hybrids we suggest you try out the new Gable varieties we are offering.

ARNOLDIANA AZALEAS

In 1914 the late Jackson Dawson, then superintendent of the Arnold Arboretum, at Boston, Mass., created a splendid new type of hardy Azalea by crossing Azalea Kaempferi and Azalea Amoena. Of the seedlings thus produced a considerable number of them were grown at Boston from their infancy until flowering age, when the following ones of unusual beauty and vigor of growth were selected.

Chugai Hybrid Azaleas

A new group from the Chugai Nursery Co. near Osaka, Japan. These are late flowering. Flowers are usually variegated, white or pink ground with red, lilac or purple stripes, white base with colored margin, or purple with white variegation and edge. These need more and wider trial before we can recommend planting in exposed or colder sections. The late freeze we had last spring split the bark on some of them, although this was not a fair test of hardiness as they had made quite a growth when we had two nights of 28 degree freezing weather on them.

Prices: *2 in pot plants at $2.50 per 10 of a variety, $20.00 per 100. Not less than 25 of a variety at the 100 price.

BUNKWA (No. 127654). Pale lilac-pink, large flowers. Soft and pleasing. Late June.

EITEN (No. 127658). White with purple variegation and sandy blotch, white margin, large flowers.

FUJJI-NO-KOSHI (No. 127659). Violet-purple variegation on white. Large. June.

GUNBI (No. 127664). White with rose madder spots. Often tipped same. June.

GUNREI (No. 127665). Ruffled, flushed rose madder, often striped same. June.

GYOKUSHIN (No. 127668). White with tyrian-rose spots, often lighter striped.

HOW-RAKU (No. 127672). Large flowers, white with chartreuse blotch and often tyrian-rose broad stripes. June.

JINDAI (No. 127674). Large 4 inch flowers, white with chartreuse throat. June.

KAIGETSU (No. 127676). White with clear purple variegation and clear white base, or purple with white base. June.

KOWKOKU (No. 131299). Has not flowered here.

MAI-HIME (No. 131301). Tyrian-rose with darker spots, often white and tyrian variegation.

TAMA-SUGATA (No. 131320). Salmon margin with white base. Very lovely. June.

A BOOK "AZALEAS AND CAMELLIAS By H. H. HUME

Interest in Azaleas and Rhododendrons is greatly increasing. Until now little information on varieties, care and culture of these plants has been available. Mr. Hume accurately and thoroughly describes the varieties best suited for various uses and discusses questions on culture, such as soils, fertilization, planting, propagating, and general care, indoors and out. He has taken special care to describe accurately the several groups of Azaleas and Camellias, and his suggestions on the use and culture are very practical. If you are growing Azaleas and Rhododendrons you will find this book much help. While the book is entitled "Azaleas and Camellias" it applies equally to Rhododendron culture. Price **$1.75**, postpaid.

EMBOSSED ZINC LABELS

We will make from your list of varieties, Embossed Zinc Labels, one-half inch wide at seven cents each in any quantity desired. These labels will permanently identify your plants.

Glenn Dale Hybrid Azaleas

The Division of Plant Exploration and Introduction at the Glenn Dale Plant Station introduced, in 1941, a group of selected seedlings from their own crosses. We have been growing and propagating these plants since then and we are now offering them to the trade.

These plants are most interesting. The flowers run to over 3 inches across and include both self colored and variegated. The plants are mostly excellent growers and do well here, and from all appearances will grow well in much colder sections. We hope to know more about this soon.

We only have a small quantity of some varieties but hope to get all varieties distributed in as large area as possible so we may have information as to how they grow generally throughout the country. If you get some of these we will appreciate knowing how they grow with you. We suggest you give these a trial.

Prices: *2 in. pot plants at $2.50 per 10 of a variety, $20.00 per 100. Not less than 25 of a variety at the 100 price.

ALABASTER (No. 141770). Late, medium height, rather spreading habit, 2 inch hose-in-hose flowers, white with an occasional fleck of pink.

Aunt Mary's Sweet Corn

THE SWEET CORN SUPREME

This is the most wonderful sweet corn we have ever grown. One grower describes it as "the best sweet corn in the world." Is of the most delicious flavor and keeps a long time before becoming too hard to use. In fact, usually requires artifical heat to cure it for seed purposes.

Aunt Mary's corn, by its excellent quality, sweetness, and flavor makes a stronger appeal to the corn-loving public than most any other variety and that appeal continues long after you are tired of other sweet corns.

Price liberal size packets, 35c each, 3 for $1.00, postpaid.

If after growing this wonderful sweet corn you are not entirely satisfied we will refund every cent you paid us for it.

OUR SURE TO BLOOM STRAIN

When in bloom its fragrance sells it. Its small size and low price permits the customer to take it along. An ideal cash and carry item. Our improved strain blooms in May and again in August until frost.

Plants are solid, compact and symmetrical. The profusion of soft pink flowers attract favorable attention and the strong sweet fragrance clinches he sale.

Requires a cool house, a little room and only eight weeks to force into full bloom. Can be shipped safely throughout the winter months by freight, direct from growers, without damage.

PAINTED WOOD TREE LABELS WIRED

We have about 50,000 painted, wired Wood Tree Labels 3½ inches long which we will furnish as long as they last at $3.00 per thousand.

HOLLY (*Ilex*)

We consider the Holly one of the very best ornamental trees or shrubs. Nothing is prettier than one of our American Hollies with great clusters of bright red berries and dark green leaves shining above the snow in winter. The nurseryman who will grow a collection of Hollies to a specimen size will have something he can sell, whether times are good or whether they are bad. There is always a demand for them, and there will be as long as any other plants will sell. We know you who took our advice five years ago to plant Holly will confirm this.

	Each	10	100	1000
ILEX CASSINE ANGUSTIFOLIA (Dahoon Holly). A beautiful shrub or small tree. Narrow, shallow-toothed, glossy green leaves, and bright red berries. Hardy Virginia southward.

ILEX GLABRA (Inkberry or Winterberry). Shrub to 6 or 7 feet tall, with upright slender branches; leaves ¾ to 2 inches long, dark green above, light green beneath; fruit black. Flowers in June; fruits late in autumn and remaining during winter. Hardy as far north as New England and Southern Ontario. Very popular for roadside planting.				
2 to 3 ft. B&B	$1.50	13.50	125.00	
3 to 4 ft. B&B	2.00	18.50	175.00	
4 to 5 ft. B&B	2.50	23.50	225.00	
ILEX OPACA (American Holly). An evergreen tree to 40 feet tall, with spreading branches forming a narrow pyramidal to globe shaped head; leaves 2 to 4 inches long, with narrow spiny teeth, dull green above, yellowish green beneath; fruit red, globose, about ¼ inch across. Flowers in May and June; fruits late in autumn through winter. Hardy in Massachusetts southward. Much used for Xmas decoration.

ILEX OPACA CROONENBURG. The Wonderful New Holly. In a mature plant the leaves are 2½ to 3¼ inches long and 2 to 2½ inches wide, having about 7 to 9 spines of a very dark green, not having the usual yellowish tint found in most familiar American Hollies. It bears berries from cuttings almost continuously, as three year old plants usually are well loader with berries. This is a very special variety.				
2 to 3 ft. B&B	$4.50			
ILEX OPACA EAST PALATKA. A cross of Dahoon and Opaca. Its evergreen leaves are practically spineless. The deep red berries are bourne in heavy clusters, ripen a month or so before Opaca and persist on the tree until spring.				
6 to 7 ft. B&B	7.50			
ILEX OPACA FEMINA. A berry-bearing form of the American Holly. Cuttings selected from good berry-bearing trees.

Stellata Waterlily (Waterlily Magnolia)

This new Magnolia was named "**Waterlily**" on account of its resemblance to a waterlily and its sweet fragrance. Supposed to be a cross between Soulangeana and Stellata. Bushy and twiggy somewhat like Stellata. Bears a great profusion of flowers about the same time to a little later than Stellata. Flowers are well placed on ends of branchlets measuring from 4½ to 6 inches across, consisting of from three to five layers of petals averaging from twenty to thirty to a flower. Buds are flesh-pink; flowers are blush-pink, fading to white. Some seasons the flowers are all nearly pure white. This is a very attractive Magnolia and well worth space in your garden.

Taxus (Yew)

It is only in the past few years that nurserymen in the United States have begun to really appreciate and grow the Yew. In England there are Yews more than a hundred years old, but unfortunately the English Yew (Taxus Baccata) is not reliably hardy in the north and many do not realize that the Japanese and many forms of Media are perfectly hardy in and around Boston, and the Japanese even in northern New England.

They are not so particular as to character of soil excepting it should not be too wet, but they do appreciate plenty of good plant food. They are immune to many insect pests and plant diseases so destructive to many other evergreens.

The Yew in its many species and forms can well be used in most all places where any other evergreen will do well.

We honestly believe you will do well to plant and grow on some of these Yews.

MEDIA HUNNEWELLIANA. A natural cross between the Japanese and American Yews. An intermediate between the parents in habit of growth, color of foliage and in general appearance. Hardy, but in winter the clear green of its foliage is masked by a yellowish-bronze pigment.

* 6 to 8 in. trans.	2.25	20.00

MEDIA KALLAY. A newer selection from Ohio. Vase shaped. Good grower and of a good green color.

* 4 to 6 in. trans.	$2.00	$16.50
* 6 to 8 in. trans.	2.25	20.00
* 8 to 10 in. trans.	3.00	25.00

MEDIA KELSEYI. Begins bearing berries even on small plants. Fairly slow grower; dark green, dense needles of the Nana type. Upright bush. Larger sizes literally infested with bright red fruits. We never grow enough to supply the demand.

* 3 to 4 in. trans.	$2.50	$20.00

MEDIA NEWPORT. This is the narrowest growing Yew we have ever grown. Foliage is a good green color. This plant is adaptable to places where most other plants would be too wide. Stock again very limited.

* 4 to 6 in. trans.	$3.00	$25.00

MEDIA OVATA. Broad upright in habit, large dark leaf and is unusually attractive throughout the year. Heavy fruiter.

* 4 to 6 in. trans.	$2.00	$16.50
* 6 to 8 in. trans.	2.25	20.00

MEDIA TAUNTON. A low growing, heavy, dark green foliage Yew. This is an unusual type in that its branches start out horizontally and then make an upward growth. We found this growing in Massachusetts and consider it distinct from all other Yews we are growing. Stock very limited.

* 4 to 6 in. trans.	$5.00

MEDIA THAYERI. A low growing type. Has good color foliage.

* 4 to 6 in. trans.	$2.00	$16.50
* 6 to 8 in. trans.	2.25	20.00
* 8 to 10 in. trans.	3.00	25.00

MORE HATFIELD YEWS

The following varieties were grown from stock purchased from the late T. D. Hatfield. He selected these as being the best of his unnamed varieties and we are still carrying them under his original numbers. We are giving brief descriptions.

	Each	10	100	1000
MEDIA HATFIELD No. 2. Real dark foliage, upright grower, very dense needles medium length. Very good.				
* 4 to 6 in. trans.			$2.00	$16.50
* 6 to 8 in. trans.			2.25	20.00
15 to 18 in. B&B	2.50	23.50		
HATFIELD No. 6. Somewhat like No. 8 in growth but twigs are not as heavy; leaves narrow. Very graceful.				
* 4 to 6 in. trans.			$2.00	$16.50
* 6 to 8 in. trans.			2.25	20.00
* 8 to 10 in. trans.			3.00	25.00

15 to 18 in. B&B	2.50	23.50		
18 to 24 in. B&B	3.50	32.50		
HATFIELD No. 8. Slow growing; very compact. Foliage resembles Cuspidata Nana. Bright green in color.				
* 6 to 8 in. trans.		2.25	20.00	
* 8 to 10 in. trans.		3.00	25.00	
18 to 24 in. B&B	3.50	32.50		
HATFIELD No. 18. Similar in growth to Taxus Cuspidata; a shade lighter color foliage, making it wonderfully attractive. Probably the most rapid grower of all the low types of Taxus. However it can be kept compact with a little shearing. If you want a good, quick grower, yet one having the good qualities of Cuspidata we recommend this one.				
* 6 to 8 in. trans.		2.25	20.00	
* 8 to 10 in. trans.		3.00	25.00	
*10 to 12 in. trans		3.25	30.00	
HATFIELD No. 23. Short, fine, slender foliage. Spreading type. Slow growing.				
* 4 to 6 in. trans.			$2.00	$16.50
* 6 to 8 in. trans.			2.25	20.00
12 to 15 in. B&B	2.00	18.50		
15 to 18 in. B&B	2.50	23.50		

CEPHALOTAXUS DRUPACEA (Japanese Plum-Yew). Shrub or small bushy tree rarely to 30 feet tall with wide spreading branches, usually light green; leaves about one inch long abruptly pointed, narrow and straight often upturned; purple fruit about one inch long. Hardy in sheltered places as far north as Massachusetts.

* 4 to 6 in. trans.		$2.00	$16.50
* 6 to 8 in. trans.		2.25	20.00

CEPHALOTAXUS PEDUNCULATA FASTIGIATA (Harrington Plum-Yew). This plant grows almost exactly like a fine type of the Irish Yew, forming a tall, narrow, compact, dark green column with thick, narrow leaves 2 inches long. Hardy as far north as New York. Very nice.

* 6 to 8 in. trans.	2.25	20.00	
12 to 15 in. B&B	2.00	18.50

Wood Preservative Tests

A recent report on tests at Cornell University, Ithaca, N. Y, with wood preservatives for greenhouse flats indicates that it is possible to increase the length of life of cheaper grades of lumber and that the material tested, Cuprinol, had no adverse effects on plant growth. Since some other preservatives contain mercury and creosote have been observed to have toxic effects on plants, Cuprinol was tested in closed chambers with plants and found to be non toxic.

In conducting the tests to determine the value in preserving wood, flats were made of southern pine used in Florida orange crates. The flats are given a quick dip after nailing and then filled with soil. The flats were then placed on rose benches, and each time the rose beds were watered, the soil in the flats also was watered, Other flats were handled in a similar manner except they were not dipped in the wood preservative.

At the end of the first year, the untreated flats were so badly decayed that they could not be lifted. After two years, the treated flats were reported as good as new except that many of the nails had rusted and broken.

We can furnish you Cuprinol at the following prices: 1 gal. cans at $2.90 per gallon; 5 gal. pails at $2.80 per gallon; 50 gal. drums at $2.70 per gallon.

Cuprinol covers and preserves approximately 400 square feet of wood to the gallon (brush applied).

Root Cuttings
Better and Quicker
WITH
THE PLANT HORMONE POWDER

ROOTONE
PATENTS PENDING

Just Dust and Plant—No Solutions
No Waiting—No Watching

We recommend ROOTONE because we have found it of much help to us in rooting cuttings both in saving of time and in increased roots to the cutting. We use it on all the cuttings we put in. We know it pays us both in better roots and time saved in cutting beds.

ROOTONE Is Best For Cuttings Because—

LOW COST—Can treat 30 to 50 cuttings for one cent.

SIMPLICITY—No skill is needed to apply ROOTONE. No measurements, no vials, no elaborate charts to follow, or clock-watching are needed. Just dip in dry powder and plant.

SPEED OF ROOTING—The time of rooting of cuttings is cut by ROOTONE treatment to anywhere from one-half to one-tenth of the time required without treatment.

SURENESS OF ROOTING—Cuttings that root with difficulty, such as holly, magnolia, arborvitae, lilac and dogwood will respond in greatly increased percentages and in shorter time.

ROOTONE is a general stimulant for plants, supplying extra hormones at times when the plant is able to use more than nature provides.

ROOTONE treatment hastens and improves the rooting of cuttings; increases germination from seeds and bulbs, resulting in earlier flowering.

2-oz. Jar $1.00—1 lb. Can $5.00, Postpaid.

A two-ounce jar will treat up to 3000 cuttings; one pound will treat up to 40,000 cuttings.

No solution or soaking treatment is necessary. Just dip the base of the cutting in dry powder and set in the propagating bed or cold frame.

TRANSPLANTONE

The Vitamin Hormone Stimulant For Plants

When seedlings, plants, shrubs or trees are transplanted, roots are usually damaged to some extent and growth is temporarily checked. The beneficial effect of Vitamin B-1 and other parts of the Vitamin B complex on roots has been established in research work by leading plant physiologists.

These chemicals and root-forming hormones are combined in TRANSPLANTONE to enable transplants to reestablish themselves more readily.

Thus a treatment of TRANSPLANTONE will stimulate old roots, hasten the formation of new ones and reduce the risk of interrupted growth or loss of plants.

3-oz. Can $1.00—1-lb. Can $4.00, Postpaid

WHAT ABOUT VITAMIN B1

Vitamin B-1 is necessary for root growth. Plants that lack this vitamin grow better when **Transplantone** is fed to them. For plants that have enough B-1, **Transplantone** is effective because it contains other important stimulating vitamins and chemicals. **Transplantone** is a balanced vitamin hormone stimulant for plants in general.

You Should Grow
The Rare Franklinia

(FRANKLINIA ALATAMAHA—GORDONIA ALATAMAHA)

One Of Our Best Sellers

Our sales on the Franklinia have increased in the past three years the most of any plant we are selling. It is one of the plants that most every one wants once they see it. They tell their friends about it too.

This exquisite fall flowering tree was brought in 1777 from the banks of the Alatamaha River in Georgia to Bartram's garden at Philadelphia. John Bartram recognizing its extraordinary beauty and value, named it in honor of his life-long friend, Benjamin Franklin.

The original grove of Franklin trees was again visited in 1790, but from that day to this no one has seen these trees growing in the wild though many expeditions have searched the banks of the Alatamaha for it.

Franklin's tree is beautiful in detail and marvelous in landscape effect besides blooming at a season when few shrubs or trees are in flower.

The slender trunk and graceful branches are so muscular and sinewy in appearance that one almost expects motion as under a greyhounds skin. The bark is smooth and dark gray, with wavering lengthwise markings of lighter color.

Each twig develops at its tip a cluster of buds of graduated size, like overgrown greenish pearls. Early in August the largest of these attain the size of marbles. Then the guard petal folds back, still retaining its firm spherical form. From is shelter emerge four other petals, satiny, snowy white, elaborately frilled and pleated. The snowy, frilly chalice, three inches in diameter, holds a sumptuous mass of orange-gold stamens and breathes forth a delicate, balmy fragrance.

Each flower lasts two or three days and then drops cleanly. **There is a constant succession of bloom till hard frost.** We frequently get the unusual effect of a tree clad in crimson autumn foliage and abundantly starred with white flowers.

The Franklinia begins blooming when not more than three or four feet high. Young trees under favorable conditions increase in height a foot or more each season. Specimens thirty feet high are known. It develops naturally with several trunks, but may easily be trained to a single trunk by removing the sprouts which start from the base.

Franklina prefers full sun and has proven entirely hardy about New York and hardy in favorable locations about Boston. It is an especially desirable tree for the small intimate garden, loved and lived in. It is a charming lawn tree and the grass may be allowed to grow closely about the trunk. It also thrives when planted by pools, lakes and streams. Its light elegance of form and color contrasts exquisitely with the dark green of conifers.
